

*B1 Sub C1*  
claims.

1. (Twice amended) An immunological adjuvant composition useful for enhancing the immune response against antigens, comprising:

a first adjuvant, where said first adjuvant comprises amorphous calcium phosphate formulated as an injectable paste having a solids content of greater than or equal to 40 wt%.

*B2*  
5. (Once Amended) A composition of claim 3, wherein 25-100% by weight of said composition consists of said particles having a diameter between 0.1 nm and 900 nm.

*B3 Sub C3*  
13. (Twice amended) A method for stimulating an immune response in a mammal, said method comprising:

administering to the mammal a composition comprising amorphous calcium phosphate formulated as an injectable paste having a solids content of greater than or equal to 40 wt%.

14. (Twice amended) A method for increasing the immunogenicity of an antigen in a mammal, said method comprising:

co-administering both an antigen and a composition comprising amorphous calcium phosphate formulated as an injectable paste having a solids content of greater than or equal to 40 wt %.

15. (Twice amended) An immunological adjuvant composition useful for enhancing the immune response against antigens, comprising:

a first adjuvant comprised of an injectable calcium phosphate paste capable of
